

Rehabilitation Success!!!

We are pleased to share another wonderful rehab success story from:

Name: Mr. Nick A.

Admitting Diagnosis: (S82.201S) fracture of shaft of right tibia sequela / fracture of upper end of left tibia sequela (S82.102S)

Admission Date: 03/16/2018

Discharge Date: 09/04/2018

Discharge Location: Private Residence

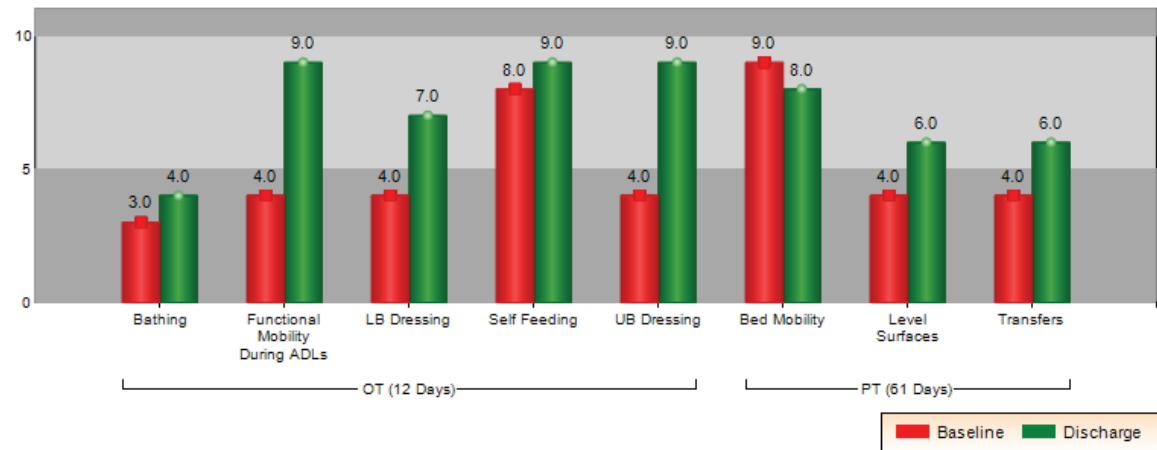

Success Story: Mr. Adams was admitted to Ripley Healthcare & Rehab on 03/16/2018. He was involved in a head on collision resulting in multiple fracture of bilateral lower extremities and left upper extremities. He was completely dependent on bed mobility transfers, activity and (ADL's care) Activity of daily living. He had an external fixator on right lower extremities and was Non weight bearing in bilateral lower extremities an left upper extremities.

Mr. Adams received extensive Occupational & Physical Therapy services at the start of care the focus was on bed mobility and up in chair tolerance. He was hoyer lift transfers due to (NWB) Non weight bearing status an was only able to tolerate up in chair for very short periods of time and the time in chair was only in a reclining wheelchair. He received strengthening activities for upper & lower extremities as well as trunk strengthening exercise. Once Mr. Adams weight bearing status changed for lower extremities he was able to begin assisting with transfers & ambulation with rolling walker platform attachment to left side of walker. He received gait training, transfer training & activity of daily living training (ADL)for several weeks.

Ripley Healthcare and Rehabilitation Center is dedicated to providing comprehensive skilled nursing care and rehabilitation, ventilator dependent care, and long term care in a professional, caring environment. Our partnership with Evergreen Rehabilitation affords us the opportunity to offer state of the art technology and a revolutionized rehabilitation program, aimed at restoring independence and quality of life.

Functional Outcome Measures

On 09/04/2018 Mr. Adams was able to return home with family and was able to ambulate 200 feet with stand by assist (SBA) using rolling walker no platform attachment no assistance needed. Mr. Adams has made a remarkable recovery with his six months stay at Ripley Healthcare. We believe that Mr. Adams will make a full recovery with continued home health services. we were more than pleased with Mr. Adams recovery and wish him all the best in his future.
